  - 7000 gallons of water
  - 3 cubic yards of landfill space
  - 2 barrels of oil
  - 4,100 kilowatt-hours of electricity – enough energy to power the average American home for five months.
- Recycling one aluminum can saves enough energy to run a 100 – watt bulb for 20 hours, a computer for 3 hours, or a TV for 2 hours.
- Recycling five 2-litre plastic (PET) bottles can produce enough fiber to make an extra-large t-shirt.
- Only 1% of the Earth's water is drinkable.
